

INVESTMENT STRATEGY

Under normal market conditions, the Fund invests in the equity securities of companies that pay current dividends and that the Fund's portfolio managers believe have the potential to increase their dividends with regularity. Equity securities in which the Fund invests consist primarily of common stocks, but may also include MLPs and REITs. The Fund will invest primarily in securities of U.S. companies, but may invest up to 20% of its net assets in foreign companies through investments in ADRs. The Fund invests in companies in numerous market sectors and with various market capitalizations. The portfolio managers expect to invest mainly in large-capitalization companies (those with market capitalizations of \$10 billion and higher), but may also invest in mid-capitalization companies (market capitalizations of \$2 billion to \$10 billion) and small-capitalization companies (market capitalization of less than \$2 billion). The Fund will generally remain fully invested, and under normal market conditions, the Fund's portfolio will consist of approximately 30 to 80 companies.

PERFORMANCE

	Average Annual Performance as of 03/31/17				
	3 month	YTD	1 year	3 year	Since Inception (4/10/13)
DRDAX Class A Load	-1.37%	-1.37%	3.37%	5.62%	7.01%
DRDAX Class A No Load	3.83%	3.83%	8.79%	7.44%	8.41%
DRDCX Class C Load	2.63%	2.63%	7.06%	6.66%	7.60%
DRDIX Class I	3.86%	3.86%	9.10%	7.71%	8.67%
S&P 500 TR	6.07%	6.07%	17.17%	10.37%	12.88%

Performance for the Class A share without load is shown at NAV, and does not reflect the maximum sales charge. If reflected, total return would be reduced.

Performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Fund performance current to the most recent month-end may be lower or higher than the performance quoted and can be obtained by calling 312-795-1000.

Performance data shown reflects the Class A shares maximum sales charge of 5.00% and the Contingent Deferred Sales Charge (CDSC) of 1.00% for the Class C shares.

Beta	0.80
ROE (%)	24.0
LT Debt/Capital (%)	43.6

Earnings growth for a Fund holding does not guarantee a corresponding increase in market value of the holding or the Fund.

MARKET CAP BREAKDOWN

Weighted Average Market Cap. (B)	\$97.4
Median Market Cap (B)	\$42.5
Large Cap	87.0%
Mid Cap	13.0%
Small Cap	0.0%

DIVIDEND INCREASE ANNOUNCEMENT SUMMARY

Companies	Quarter	YTD
Reporting Increase	19 of 42	19 of 42
Average Increase	6.7%	6.7%

Average percentage is a calculation of the average of the dividend increases announced by the companies in the fund during the period shown.

Mutual fund investing involves risk. Principal loss is possible. The Fund's strategy of investing in dividend-paying stocks involves the risk that such stocks may fall out of favor with investors and underperform the market. In addition, there is the possibility that such companies could reduce or eliminate the payment of dividends in the future or the anticipated acceleration of dividends could not occur. The Fund may invest in foreign securities and ADRs which involve political, economic and currency risks, greater volatility and differences in accounting methods. Medium- and small- capitalization companies tend to have limited liquidity and greater price volatility than large-capitalization companies. Investments in REIT securities involve risks such as declines in the value of real estate and increased susceptibility to adverse economic regulatory expenses. The fund may invest in MLPs which can be negatively influenced when interest rates rise. These investments also entail many of the general tax risks of investing in a partnership. There is always the risk that an MLP will fail to qualify for favorable tax treatments.

Diversification does not guarantee a profit or protect from loss in a declining market.

P/E 2017e is the most-recent stock price divided by the mean analyst EPS (earnings per share) estimate for the current fiscal year. This number gives some indication of how cheap or expensive a stock is compared with consensus earnings estimates. The lower the forward P/E, the cheaper the stock. FactSet Estimates data is used in the denominator of this calculation. Price to Book (P/B) Ratio is a weighted average of the price/book ratios of all the stocks in the underlying strategy portfolio. The P/B ratio of a company is calculated by dividing the market price of its stock by the company's per-share book value. Stocks with negative book values are excluded from this calculation. Estimated Long Term Growth Rate is the FactSet mean analyst estimate for annualized future EPS growth for a minimum of 3 years and maximum of 5 years, depending on available analyst estimate data. P/E to Growth is the P/E 2017e divided by the Estimated 3-5 Year EPS Growth. Beta is a measure of the degree of change in value one can expect in a portfolio given a change in value in a benchmark index. A portfolio with a beta greater than one is generally more volatile than its benchmark index, and a portfolio with a beta of less than one is generally less volatile than its benchmark index. Return on Equity (ROE) is the percentage a company earns on its shareholders' equity in a given year. The calculation is net income divided by end-of-year net worth, multiplied by 100. LT Debt/Capital is calculated by dividing long-term debt by total capitalization (the sum of common equity plus preferred equity plus long-term debt).

The S&P 500 is a stock market index based on the market capitalizations of 500 leading companies publicly traded in the U.S. stock market, as determined by Standard & Poor's. It is not possible to invest directly in an index.

The Fund's investment objectives, risks, charges and expenses must be considered carefully before investing. The summary prospectus and prospectus contains this and other important information about the investment company, and it may be obtained by calling 312-795-1000 or visiting DearbornPartners.com. Read it carefully before investing.

Dearborn Partners is the adviser of the Dearborn Partners Rising Dividend Fund which is distributed by Quasar Distributors, LLC.
